Summary

Information Technology undergraduate at Kongu Engineering College with strong foundations in Python, Java, Data Structures and Algorithms, Object-Oriented Programming, SQL, and Full-Stack Web Development. Experienced in building web applications, REST APIs, and database-driven solutions. Passionate about backend development, software engineering, and solving real-world problems through technology.

Education

Kongu Engineering College	2024 – 2028
B.Tech Information Technology	CGPA: 8.2 / 10.0
Shri Ganga Higher Secondary School	2024
Higher Secondary Education (HSC)	Percentage: 80.6%
Shri Ganga Matriculation School	2022
Secondary School Leaving Certificate (SSLC)	Percentage: 83.6%

Technical Skills

- **Languages:** Python, Java, JavaScript, HTML, CSS
- **Backend:** FastAPI, REST APIs, Node.js, Express.js, API Integration, JSON Handling
- **Frontend:** HTML, CSS, JavaScript, React.js, Responsive Web Design
- **Database & Core CS:** MySQL, PostgreSQL, MongoDB, SQL, Data Structures & Algorithms, OOPs, DBMS
- **Tools & Frameworks:** Git, GitHub, VS Code, Postman, Software Development Fundamentals

Projects

Cheaprr – Flipkart & Amazon Product Comparison Platform	Live Demo GitHub
• Developed a full-stack web application that extracts, aggregates, and compares real-time product prices from major e-commerce platforms. • Built clean, interactive backend REST APIs to fetch and structuralize real-time product details and JSON payloads. • Designed an intuitive interface enabling users to search items, compare price points, and view availability side-by-side.	
PicShift – Image Processing Web Application	Live Demo
• Developed a full-stack web application tailored for real-time image conversion and optimization. • Built responsive user interfaces and seamlessly integrated backend services for file handling. • Optimized frontend application performance to enhance overall load speeds and user experience.	
KuttyShare – Real-Time Collaborative Code Editor	GitHub
• Built a collaborative coding platform featuring real-time code updates and sharing functionality. • Implemented frontend-backend communication workflows using robust APIs and unique session links. • Utilized Git and GitHub for version control, branching strategies, and efficient code management.	

Achievements

- Successfully built and deployed multiple dynamic full-stack web applications.
- Practicing Data Structures and Algorithms consistently to strengthen analytical problem-solving skills.
- Experienced with complete Git/GitHub workflows including branching, merging, and pull requests.
- Actively learning modern Python backend architectures and robust software engineering methodologies.

Areas of Interest

Python Development, Backend Engineering, Full-Stack Development, Software Engineering, API Development, Database Systems.
